SUMMARY:

Data Science graduate currently working as a Jr Data Analyst, seeking opportunities in Analytics or Developer roles. Experienced in Python (FastAPI, Numpy, Pandas, Machine Learning, API integration), database management (PostgreSQL, MySQL), and data visualization (Power BI, Apache Superset, Excel). Strong analytical thinking, problem-solving, and critical-thinking skills. Capable of developing efficient software solutions with AI-driven automation and analytics.

SKILLS:

Programming Languages: Python (FastAPI, Numpy, Pandas, Machine Learning)

Version Control Systems: Git, GitHub

Database Management: PostgreSQL, MySQL

Data Visualization Tools: Power BI, Apache Superset, Excel

Core Competencies: Data analysis, ETL, Data modeling, API integration, Automation, Problem-solving, Analytical thinking

EXPERIENCE:

Jr Data Analyst, Azotos Software Technology (May 2025 - Present)

- Contributed to the BBNL Phase 3 Project by ensuring quality and accuracy of large-scale survey data.
- Developed Python automation scripts to convert JSON survey data into Excel for improved data processing and reporting.
- Built Micro services to capture digital meter data using Groq API, enhancing system integration efficiency.
- Supported data cleaning, transformation, and visualization to enable data-driven decision making.

EDUCATION:

PG Diploma in Applied Data Science, University of Essex, England, UK (November 2024)

B.Com (ISM), SRM University, Chennai, (May 2022)

PROJECT:

Prediction of Customer Lifetime Value using Fusion Algorithms

- Predicted Customer Lifetime Value (CLV) using historical data through multiple ML regression models.
- Implemented Decision Tree, Passive Aggressive, Random Forest, and Gradient Boosting Regressors using Python (Pandas, Matplotlib, Scikit-learn).
- Performed data collection, pre-processing, feature engineering, and model evaluation to deliver accurate predictions.
